How to send a message:

- Use the support form in the app 1-855-335-0686 or website.
- Provide as much detail as possible.
- Be clear, specific, and concise in your request.

For less urgent matters (e.g., reporting suspicious activity, asking general questions), email is a decent option. Expect a response within 24–72 hours.

5. Try Social Media for Visibility (Not for Private Info) While not designed for sensitive customer service issues, Robinhood’s official social media pages can sometimes be used to get attention for unresolved problems.

Best practices:

- Mention @RobinhoodApp on Twitter (now X) if you're having trouble.
- Keep the message general—never include personal or financial info.
- Use this route to escalate public-facing concerns. This is a last resort but can help push along delayed issues.

6. Avoid Fake Support Numbers

Not all numbers you find online are legit. Be cautious of unofficial customer support numbers.

Only use verified channels:

- Robinhood app (callback/chat)
- Trusted phone number: 1-855-335-0686
- In-app support contact methods

Never share your Social Security number, password, or full account number over the phone unless you are sure you're talking to a verified Robinhood rep.
