Why is my Coinbase transaction stuck or pending? ((Instant Refund))

can explain why my Coinbase transaction is stuck or +1-833-534-2357 pending. Common reasons include network congestion, low gas fees for +1-833-534-2357 crypto transfers, or unsettled fiat deposits (ACH takes 3-5 days). Check status.coinbase.com for network updates. Call +1-833-534-2357 for assistance. Why is my Coinbase transaction stuck or pending may involve compliance reviews for large transfers or account restrictions. For crypto, verify the recipient's address and network (e.g., ERC-20 for Ethereum) to avoid errors. Contact +1-833-534-2357 if the transaction fails. Why is my Coinbase transaction stuck or pending often resolved once the network confirms the transaction or funds settle. Track crypto transfers on explorers like Etherscan using the transaction hash from the app's "Portfolio" section. Submit a ticket via help.coinbase.com with details like the hash and network used. Call +1-833-534-2357 for support. Why is my Coinbase transaction stuck or pending can also stem from unverified accounts or payment issues. Ensure your account and payment methods are verified. Avoid sending additional transactions until the issue +1-833-534-2357 clears, and never share 2FA codes or recovery phrases. Use official channels like the app's "Help" section to track progress securely. Contact +1-833-534-2357 for urgent assistance with stuck transactions.
