## Repair vs. Replace: Making the Right Choice

A good rule of thumb is the "50% rule." If the repair costs less than half the price of buying a new refrigerator, it's usually best to repair. Most refrigerators last anywhere from 10–15 years, and professional repairs can add several more years of reliable use.

While some problems are unavoidable, a little maintenance goes a long way in keeping your fridge running smoothly:

- Clean the condenser coils regularly to prevent overheating.
- Keep the seals on doors clean and tight to avoid cool air leaks.
