What Are Hidden Apps?

Before learning [How to Open Hidden Apps in Samsung](https://tradeflock.com/how-to-open-hidden-apps-in-samsung/), it is important to understand what hidden apps are. Hidden apps are applications that remain installed on your Samsung smartphone but are intentionally removed from the Home Screen and App Drawer. Users often hide apps to protect personal information, organize their device, or prevent others from accessing certain applications.

Key Points:

- ▶ Hidden apps are still installed on the device.
- ▶ They continue to work normally in the background.
- ▶ Hiding an app does not delete its data.
- ▶ You can easily access or unhide hidden apps whenever needed.

Method 1 – Open Hidden Apps from Home Screen Settings

The easiest way to locate hidden apps is through Samsung's Home Screen settings.

Steps:

- ▶ Open **Settings** on your Samsung phone.
- ▶ Tap **Home Screen**.
- ▶ Select **Hide Apps**.
- ▶ View the list of apps currently hidden.
- ▶ Remove any app from the hidden list and tap **Done** or **Save**.

Tip: Once removed from the list, the app immediately appears in the App Drawer.

Method 2 – Use the Search Feature

If you know the app's name, Samsung's search feature can help locate it quickly.

Steps:

- ▶ Swipe up to open the App Drawer.
- ▶ Tap the Search bar at the top.
- ▶ Type the app's name.
- ▶ Select the app from the search results to launch it.

Benefits:

- ▶ Fast and convenient.
- ▶ No need to browse through all installed apps.
- ▶ Useful when you have many applications installed.

Method 3 – Access Hidden Apps Through Settings

Even if an app is hidden from the App Drawer, it still appears in the installed apps list.

Steps:

- ▶ Open **Settings**.
- ▶ Tap **Apps**.
- ▶ Scroll through the complete list of installed applications.
- ▶ Tap the desired app.
- ▶ Open it or manage its permissions, storage, and notifications.

Why use this method?

It helps confirm whether the app is installed and lets you manage its settings.

Check Samsung Secure Folder

Some users hide apps inside Samsung Secure Folder for enhanced privacy.

Steps:

- ▶ Open **Secure Folder**.
- ▶ Enter your PIN, password, pattern, or fingerprint.
- ▶ Access the apps stored inside.

Advantages:

- ▶ Extra layer of security.
- ▶ Keeps personal apps separate.
- ▶ Protects sensitive information from others.
